

NO MORE DRAB CONCRETE PATIOS

At last you can quickly and easily cover that drab, gray concrete patio with a classic hardwood deck... without the hassles and high cost of a building a custom deck. SwiftDeck tiles just click into place without fuss or effort.....it's that simple. And best of all, you can complete a typical project in just an hour or so...completely finished and ready to enjoy, the moment you've clicked the last tile into place.

COVERS MOST HARD SURFACES

You can install SwiftDeck on practically any solid, flat, surface, both indoors or outdoors...even wet areas or high traffic commercial areas.

- concrete, paved or tiled areas
- weather worn wood decks
- walkways or pathways
- rooftops and balconies
- basements and workrooms
- sun rooms, gazebos & greenhouses
- around pools, spas, or hot tubs

SAFE, SECURE & VERSATILE

- tiles lock securely, preventing all movement
- plastic mesh base eliminates pools of water
- create your own deck patterns with two distinct tile designs & one double length tile
- easy to extend, change or take up as required

BUILT TO LAST

SwiftDeck tiles will survive the harshest of weather – blazing sun, drenching rain, or covered with snow & ice.

QUICK & EASY INSTALLATION

SwiftDeck is a breeze to install. Inbuilt connecting tabs ensure tiles snap accurately, effortlessly and securely into position every time.

- no tedious surface preparation
- no building plans or permits required
- no special skills needed
- no nails, no screws or adhesives
- easily cut to fit posts, pipes or corners
- ready to enjoy immediately

HARD WEARING, EASY CARE SURFACE

Exclusively made with Ipe hardwood...one of the hardest, strongest and most durable wood species available.

Easy to care for...just brush with a broom or wash with water to remove loose dirt. To assist in preserving the original wood color, we recommend applying a good quality deck oil every 12 months or so.
